The first, and by these words most commonly indicated, is the poetic ruffian who sustains such an important part in the two plays of our immortal dramatist entitled, respectively, The Third part of King Henry VI, and The Life and Death of King Richard the Third. Next after may be named the creations of a number of English authors who have taken different views of the historical Richard, and have therefore painted him in colors varying from an immaculate white through several shades of grey departing from the sombre blackness of the portrait drawn by the great playwright. Lastly may be mentioned the character least frequently associated with the name, the man himself, who on the 24th day of June, 1483, was enthroned as an English sovereign, and set the great seal of England to his intricate but scholarly signature, Ricardus Rex. In the brief limits of this sketch, it is not purposed to attempt the task of portraying this real man, as distinguished from his several counterparts. However interesting and profitable such a study might prove, it would be probably unrewarded with practical results.
