Reviews

Unquestionably, this is actually the very best job by any publisher. It really is basic but unexpected situations within the 50 % from the book. I discovered this book from my dad and i advised this publication to discover.

(Dr. Willis Walter)

CATEGORIAL ASPECTS OF TOPOLOGICAL GROUPS AND RINGS THEORY

LAP Lambert Acad. Publ. Okt 2011, 2011. Taschenbuch. Book Condition: Neu. 220x150x6 mm. This item is printed on demand - Print on Demand Neuware - The goal of this book is to study some categorical aspects of the theory of topological abelian groups and topological modules. In topological algebra there is a small number of papers on categorical aspects of this theory. A problem which attracts the researchers attention is the epimorphisms characterization in the topological Hausdorff groups category. An important role in the categorical theory is played by the reflective subcategory concept. The famous Theorem of Birkhoff characterized varieties of algebraic systems as closed classes with respect to cartesian products, subalgebras and homomorphic images. There are more variety concepts for topologico-algebraic systems. A strong construction in topological algebra is the tensor products of modules and abelian groups. This monograph is addressed to researchers and graduate students for research, seminars and advanced graduate courses in topological algebra. 104 pp. Englisch.
